Practical IV

Roll No.:T006	Name:Nandini Chaudhary
Class:TYIT	Batch:01
Date of Assignment:09-09-2026	Date/Time of Submission:09-09-2026

Practical 4: Issue Management

A. Create issues under an Epic.

Steps:-

Step 1: Log in to Jira

1. Open the Jira application in a web browser.
2. Log in using your Jira account credentials.
3. Open the required Jira project.

Step 2: Open the Project Board

1. Navigate to the project.
2. Open the project board.
3. Make sure the project board is displayed correctly.

Step 3: Create an Epic

1. Click on the **Create** button.
2. In the **Issue Type** field, select **Epic**.
3. Enter the name of the Epic in the **Summary** or **Epic Name** field.
4. Enter the required description and other details.
5. Click **Create**.

Step 4: Open the Created Epic

1. Locate the newly created Epic.
2. Click on the Epic to open its details.
3. Verify that the Epic has been created successfully.

Step 5: Create an Issue Under the Epic

1. Open the created Epic.
2. Select **Create Issue** or **Add Issue**.
3. Select the required issue type, such as **Story**, **Task**, or **Bug**.
4. Enter the issue title in the **Summary** field.
5. Enter the required description.
6. In the **Epic/Parent** field, select the Epic created earlier.
7. Click **Create**.

Step 6: Create Additional Issues

1. Repeat the above process to create additional issues.
2. Make sure that each issue is associated with the same Epic.
3. Verify that all the issues are displayed under the selected Epic.

Result

The required issues were successfully created and associated with the selected Epic.

Output:-

This screenshot shows the Jira Kanban board for the 'FSP board' within the 'Full Stack Project' space. The board is organized into four columns: BACKLOG, SELECTED FOR DEVELOPMENT, IN PROGRESS, and DONE. The BACKLOG column contains four items, all of type 'Team Interaction', labeled FSP-1, FSP-2, FSP-3, and FSP-4. Each item has a 'Team Interaction' icon and a status icon (a person for FSP-1 and FSP-4, and a TV for FSP-2 and FSP-3). The other columns are currently empty. The left sidebar shows the project navigation menu, and the top bar includes search and filter options.

This screenshot shows the same Jira Kanban board, but with a dropdown menu open for the item FSP-4 in the BACKLOG column. The dropdown menu lists the following options: Epic, Story, Bug, and Manage types. The item FSP-4 is currently set to 'Team Interaction'. The rest of the board and the interface elements remain the same as in the previous screenshot.

This screenshot shows the Jira Kanban board after moving item FSP-4 from the BACKLOG column to the IN PROGRESS column. The item FSP-4 is now in the IN PROGRESS column, while the other items (FSP-1, FSP-2, FSP-3) remain in the BACKLOG column. The dropdown menu is no longer visible. The rest of the board and the interface elements remain the same.

B. Assign issues to users and set Priority & Due Date.

Step 1: Open the Issue

1. Open the Jira project board.
2. Select the required issue.

Step 2: Assign the Issue

1. Open the **Assignee** field.
2. Select the required team member.
3. Confirm the selected user.

Step 3: Set Priority

1. Open the **Priority** field.
2. Select the required priority level.
3. Verify the selected priority.

Step 4: Set Due Date

1. Open the **Due Date** field.
2. Select the required date.
3. Save/Update the issue.

Step 5: Verify

Check the **Assignee, Priority, and Due Date.**

Result

The issue was successfully assigned, prioritized, and given a due date.

Output:-
